

18 to 20 September 2018
Suntec Singapore Convention and Exhibition Centre

SICW is "Forging a Trusted and Open Cyberspace" in 2018, to reflect the importance of trust and openness in cyberspace, given the fast-evolving and complex cybersecurity landscape.

With cyber threats potentially impacting national security, economic and societal well-being of nations and those beyond its borders, multi-stakeholder discussions and collaborations have become more critical.

SICW 2018 will bring together governments, industry, and academia for exchange on topics ranging from cybersecurity trends and solutions, cyber norms of behaviour, to capacity building efforts, under one roof.

SICW 2018 will also include events such as the ASEAN Ministerial Conference on Cybersecurity, ASEAN Cybercrime Prosecutors Roundtable Meeting and International Cyber Leaders Symposium, among others.

GUEST-OF-HONOUR

Mr Teo Chee Hean
Deputy Prime Minister and
Coordinating Minister for National Security

HOSTING MINISTER

Mr S Iswaran
Minister for Communications, Information &
Minister-in-charge of Cyber Security

Registration for the 27th edition of GovWare is **now open!** The cornerstone conference and exhibition of SICW, GovWare 2018 invites cyber professionals, policymakers and innovators to discuss key challenges in growing cybersecurity capabilities, groom talents and cooperate with like-minded partners to respond to cyber threats that do not respect jurisdictions and national boundaries.

Conference Overview

Cyber Operations and Sense-Making

Cyber Operations & Response

Cybersecurity Ops Centre: Methodologies & Operations

Incident Response, Investigations, Forensics, and Recovery

Big Data Analytics & Deep Machine Learning

Cyber Threat Landscape & Intelligence

Enterprise Security and Data Protection: Trends & Technologies

Cybersecurity in Everyday Life

Cybersecurity in the Cloud

Cybersecurity and 5G

Cybersecurity of Cryptocurrencies

Cyber Hygiene of the Cyberspace

Proactive Cyber Defence

Strengthening the Resiliency of the Cyberspace

Internet of Things (IoT) Security

Industrial Controls Systems (ICS): Vulnerabilities & Resiliency

Cybersecurity Ecosystem

Local Industry Capabilities

Supply Chain Cyber Security

Strategies for Ops Capability & Capacity Development

Talent & Capability Development

Research & Development

Others

Darkweb, Cybercrime, Cyberwarfare

Emerging Security Technology
