

FORGING A TRUSTED AND OPEN CYBERSPACE

18 to 20 September 2018
Suntec Singapore Convention and Exhibition Centre

**NETWORK AND COLLABORATE WITH OVER 250 EXHIBITORS AND EXPERTS
AT GOVWARE – THE REGION'S MOST ESTABLISHED CYBERSECURITY
EXHIBITION & CONFERENCE**

Despite the onslaught of cyberattacks happening right now, many businesses still have outdated security tools, increasing the likelihood of their being the next headline news. Businesses need to have integrated security solutions that can catch threats faster; see it once and then stop it everywhere. Cisco will showcase how this integrated approach will help you stop threats at the edge, find and contain problems fast, control who gets on your network, simplify network segmentation and protect users wherever they are.

Conquer the unknown with Ensign InfoSecurity, the region's largest pure-play cybersecurity provider. Experience tomorrow's technologies through our iSOC services and national cyber defence capabilities. At Booth E02/F02, former Commander of US Cyber Command and Director NSA, General Keith Alexander, will share his cyber expertise on 19 Sep at 3pm. Visit ensigninfosecurity.com

Isolation – The Answer to Network Separation. Web browser isolation also known as remote browsing, delivers a simpler, more secure, cost-effective method of network separation that stops web malware and phishing attacks, while maintaining existing user workflow and experience. If your enterprise or agency has already deployed world-class security solutions, yet is still being infected and compromised, maybe it's time you looked into isolation. Visit our booth at B02 to find out more!

Cybersecurity at the Forefront of Your Operations. Experience our comprehensive suite of cybersecurity solutions now at ST Engineering Electronics Booth in GovWare 2018, where we will be having live demonstrations of cyberattack scenarios, and our future-ready comprehensive suite of cybersecurity solutions to secure your Critical Information Infrastructure (CIIs). ST Engineering Electronics, Hall 403, Booth G12.

Technology does not age well. Capable of crippling entire organisations, the fifth generation of malware could wreak havoc at an unprecedented scale in yours. Discover how Check Point's Infinity architecture, using Gen V security features like SandBlast, can prevent these advanced threats from damaging valuable data.

Forcepoint is transforming cybersecurity with systems that understand people's intent as they interact with critical data and IP, enabling companies to empower employees with unobstructed access to confidential data. Based in Austin, Texas, Forcepoint supports more than 20,000 organizations worldwide. Visit www.Forcepoint.com and follow us on Twitter at @ForcepointSec.

PCS Security integrate and deliver effective, secure solutions to help our clients fulfil security and operational objectives. For GovWare 2018, our theme is "CONTROL Your Cloud". In our showcase are solutions and services, including a secure cloud offering for customers to onboard their workloads, yet able to maintain the essential controls over encryption and access controls. This trusted cloud allows customers to:

- Control Your Keys
- Control Your Access
- Control Your Apps

Come visit us at Booth G02, as we share our insights on how you can have control over your Cloud and make IT secure.

The Cloud is Full of Risk. Your security posture shouldn't be. Symantec Integrated Defense Platform lets you focus on your priorities – digital transformations, cloud migration, you name it – knowing you are protected from end to end. Visit Booth H02 to learn about Symantec Cloud, Information, Endpoint and Threat Protection solutions.
